

Venkatesh Tambabathula

Cybersecurity Student | Full Stack Developer | DevSecOps Enthusiast

Portfolio | venkateshtambabathula99@gmail.com | +91 6309132242
GitHub | LinkedIn | TryHackMe

Summary

Cybersecurity engineering student and full-stack developer specializing in secure application development, static analysis tooling, and machine learning-driven security systems. Experienced building production-grade security scanners, malware detection tools, and full-stack web applications with a strong focus on DevSecOps practices.

Education

- B.Tech in Computer Science Engineering (Cybersecurity)** 2025 – 2028
Kakinada Institute of Engineering and Technology (KIET), Korangi
- Diploma in Engineering** 2022 – 2025
GIET Polytechnic College, Rajanagaram
Marks/CGPA: 83.6%

Skills

- Languages:** Python, Java, JavaScript, HTML, CSS
- Frameworks / Libraries:** Django, Flask, React, FastAPI, Node.js, PyQt5
- Security / DevOps:** Kali Linux, Metasploit, Semgrep, Bandit, Gitleaks, pip-audit, npm audit, OWASP
- Databases:** PostgreSQL, MongoDB, SQLite
- Tools / Platforms:** Git, GitHub, Docker, VS Code, Render, Cloudinary, Ollama

Experience

- Full-Stack Java Developer Trainee – Anurag IT Solutions**
Completed hands-on training in full-stack Java development, covering backend services, REST APIs, and application architecture.
- Team Lead – Cryptanium Agent Shield** 2026
48-Hour Industrial/OT Cybersecurity Hackathon – led a team to design and build a full-stack security analysis platform under time constraints, covering system architecture, GitHub OAuth integration, and static analysis orchestration.
- Cybersecurity Trainee, Batch 2 – NextGen Freedu**
Undergoing structured cybersecurity training covering offensive and defensive security fundamentals, network security, and vulnerability assessment.

Projects

- Student Management System [Web Application]** GitHub
Full-stack application for managing student records with role-based access.
- Grow More [Web Application]** GitHub
Django-based fashion e-commerce platform deployed on Render with Neon PostgreSQL and Cloudinary, featuring dynamic product management and a responsive UI.
- ByteBuddy Chatbot Website [Web Application]** GitHub
AI-powered chatbot web application with streaming responses and a multi-mode project generation workflow using the Groq API.
- Password Strength Analyzer [Chrome Extension]** GitHub
Browser extension that evaluates password entropy and resilience against common attack patterns in real time.
- CYBER-SNIFF [Desktop Application]** GitHub
Network packet analysis tool using Scapy and Npcap; served as team lead for the network inspection module.
- CyberWiz Sentinel [Desktop Application]** GitHub
PyQt5 desktop application for ML-based malware detection with real-time scanning and quarantine handling.
- Security Log Analysis Assistant [Desktop Application]** GitHub
Terminal-based security log analysis and audit tool for local log review, built with Python, Rich, and Textual on Kali Linux.
- Cryptanium Agent Shield [Desktop Application]** GitHub
Full-stack security analysis platform with GitHub OAuth, React frontend, and FastAPI backend, orchestrating Semgrep, Bandit, Gitleaks, pip-audit, npm audit, and ESLint.

Certifications

- Cyber Security – NextGenFreedu (LifeBox NextGen Pvt. Ltd.), Scored 93/100
- Cisco Introduction to Cybersecurity
- Cisco Linux Unhatched
- Cisco Python Essentials 1 & 2
